## New modern anodized color for our aluminum constructions

Since our customers have asked for a color alternative for the substructures of our PV kits, we would now like to fulfill this suggestion in the new year!

Our kits will continue to be available in the standard aluminum anodized (light gray) as usual; however, we have added another anodized color to our product portfolio.

Most of our kits\* are now available in a modern dark antracite gray **at no extra charge!** This offer is initially valid for the first quarter in 2021 and only while stocks last.

The anodized coating gives the aluminum profiles excellent corrosion protection in addition to great surface hardness. We are looking forward to your inquiries.

**From now on two standard color variants to choose from (anodized aluminum):**

\* Carport M, L, XL, Terrace LEA, EVA, MILA up to 5m

Some examples of reference installations:

# Charging units in a wide range from 7 to 180 kW

Selection from our wide range:

Cable length:  
2 x 4,5 m

Charging cable  
(7,2 / 11 / 22 kW)

Kabellänge:  
3m / 5m

Charging Box  
(7kW / 22kW)  
6 - 32 A  
1 / 3 phase

Charging Box  
(22 kW /  
2x11kW /  
2x22kW)  
32 A  
3 phase

Charging Station  
(2 x 11kW /  
2 x 22kW)  
32 A  
3 phase

e-bike Charging  
Station  
4 plugs 230V / 10A  
Compressor for  
inflating tires

Kabellänge: 4.5 m

DC Fast Charging  
Station  
(120 - 180 kW)  
240 A  
3 phase

We offer you one of the largest palettes of charging boxes and pillars up to fast chargers, which can be combined into real PV filling stations.

All details and technical data can be found in our special catalogue.

## Reference project: terrace with double glass modules

Between the german cities Leipzig and Dresden, an existing customer terrace was equipped with six of our M40 modules and six pieces of the M50 modules. Both module types can be combined due to the same cell distribution and a common transparency of 40%. Depending on the available area, modules of different sizes can be connected with each other.

## Completion of roof project in Bayrischzell

The roof system project for the leisure hotel in Bayrischzell, which was already presented in the December newsletter, was completed as planned on December 30, 2020, despite difficult weather conditions. The project has a total connected load of 166 kWp.

## Reference project: Terrace EVA4 + Extension EVA4

Near Munich our team has built a terrace EVA4 incl. an extension (altogether EVA8) with 16 M40 (200 Wp) modules. The outside profiles have a cross section of 120x80 mm and inside profiles 80x80 mm. The aluminum construction was previously powder coated white at the customer's request.
